# BIO-SAFE® SKIN PROTECTANT

Bio-Safe® Antibacterial Skin Protectant is an exclusive, patented formula that provides up to four hours of antibacterial, antiviral, and antifungal protection. When used under protective gloves or in pre-glove situations, Bio-Safe® forms a protective polymer coating that not only kills many pathogens (including Staph, Strep, E. coli, Salmonella, MRSA, and VRE) but also blocks chemical compounds (Mace spray, latex proteins), bodily fluids (urine, saliva, feces, semen, blood), and drugs (cocaine, methamphetamine, heroin, cannabis) from direct contact or from penetrating the skin. In addition, the manufacturer has stated that lab tests have found Bio-Safe® Skin Protectant inactivated HIV-1 virus 99.9% within thirty seconds of exposure.

Bio-Safe® is orally non-toxic and is colour and fragrance free. It will not irritate sensitive skin, will not wash or rub off, and can be applied to the hands, face, neck, arms and legs for biological and chemical protection. At five cents per application, Bio-Safe® is the most complete and affordable protection on the market today. You cant afford to be without it!

# OZONE GENERATING AIR PURIFIERS

This series of Ozone Generating Air Purifiers are used by hundreds of crime labs, police and sheriff departments and correction facilities for:

- Evidence Rooms** - for eliminating the odours from soiled clothing, marijuana, and other drugs
- Autopsy Labs** - for eliminating odours from decomposing tissue and formaldehyde fumes
- Laboratories** - for eliminating odours associated with urine specimens for drug analysis, clothing containing body fluids, and the fumes from chemicals used in labs
- Crime Scenes** - for eliminating decaying body or body fluid odours and even pepper spray

Ozone Generating Air Purifiers produce a safe, controlled level of ozone by electronically

converting molecules of oxygen (O<sub>2</sub>) into molecules of ozone (O<sub>3</sub>). During this conversion, ozone casts off its extra atom. That atom combines with the molecule of the odour's source and destroys the odour by oxidation. In doing so, ozone's extra atom is consumed, destroying noxious odours and fumes at their source and leaving behind only a "fresh air" smell.

These Ozone Generating Air Purifiers come with a full 5-year warranty. The disposable Sporax antimicrobial filter protects the internal components of the instrument and provides a broad range of control for a number of moulds, mildew, algae, and bacteria present in the environment (list available upon request).

**Reorder No.: Ap10-120** Designed to remove noxious odours and reduce harmful fumes in small to medium size laboratories/rooms up to 10,000 cubic feet on a continuous basis.

- Adjustable ozone output control provides from 3 to 300mg/hr
- Baked grey enamel metal cabinet
- Size: 10½" L x 6½" W x 8" H – weight: 9lbs
- 57 cfm (cubic feet per minute) fan

**Reorder No.: Ap40-120** Designed for laboratories/rooms up to 40,000 cubic feet and has an adjustable ozone output control, multiple option timer, and a continuous running mode.

- Adjustable ozone output control provides from 190 to 625 mg/hr.

AP-FILTER	Replacement Sporax Filters, 6/pkg, (one size fits all)	\$55.50

## NOTE

The rate of replacement for the Sporax filter depends on the density of odours and fumes where the unit is operating. Check the filter every 30 days and replace if visibly dirty.

## MEDIUM-DUTY BODY BAGS

These white bags are made of 2 layers of a 3 mil polyethylene film laminated to 100 denier scrim reinforcement material (equivalent strength to 12 mil vinyl material). This material remains flexible down to -70° F. In addition, the chlorine-free polyethylene material used in

this bag and our Heavy-Duty Bag shown below does not release chlorine gas and therefore eliminates the disposal problems associated with vinyl material. Each body bag is supplied with a Body Bag Identification Tag Kit which is described on the next page.

Reorder No.	Description	Price Per Case
BBMD-22X30	Infant size, 22" x 30", 12/case	\$144.25
